# Software Design Report

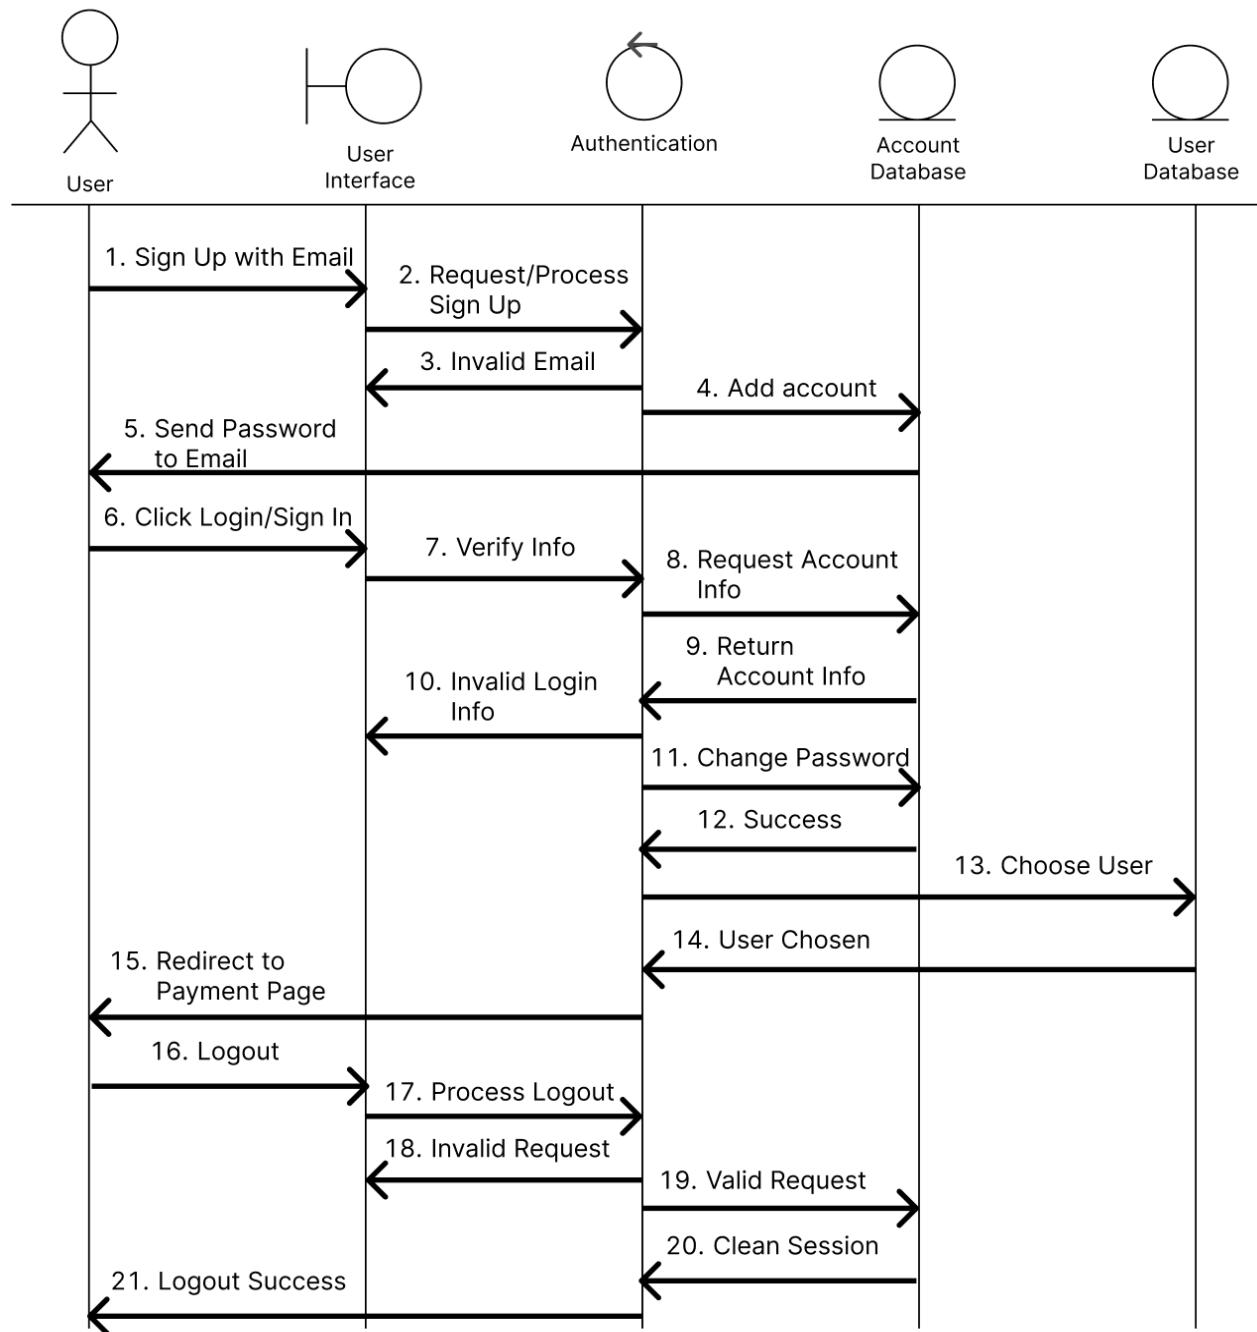

## Introduction

Mini Twitter	Version: 1.0
Software Design Report	Date: 11/21/23
Document Identifier: 10	

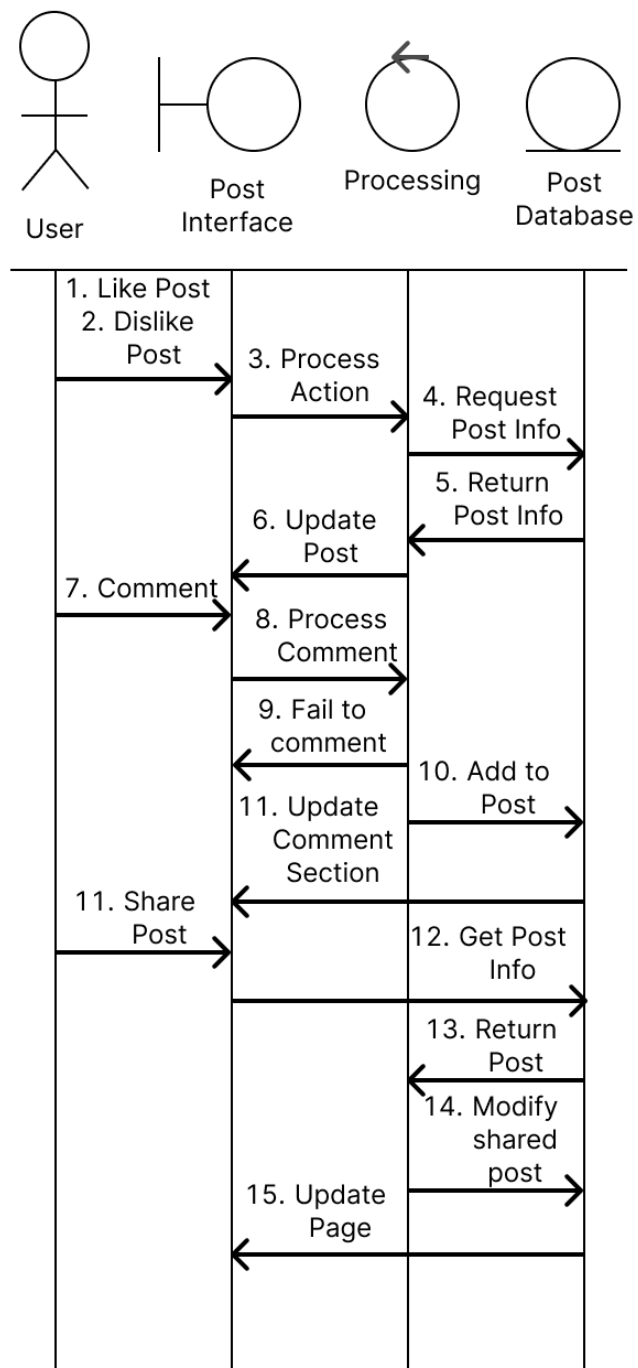

## All Use Case

Sequence Class Diagram for Sign up, login, and logout of a system:

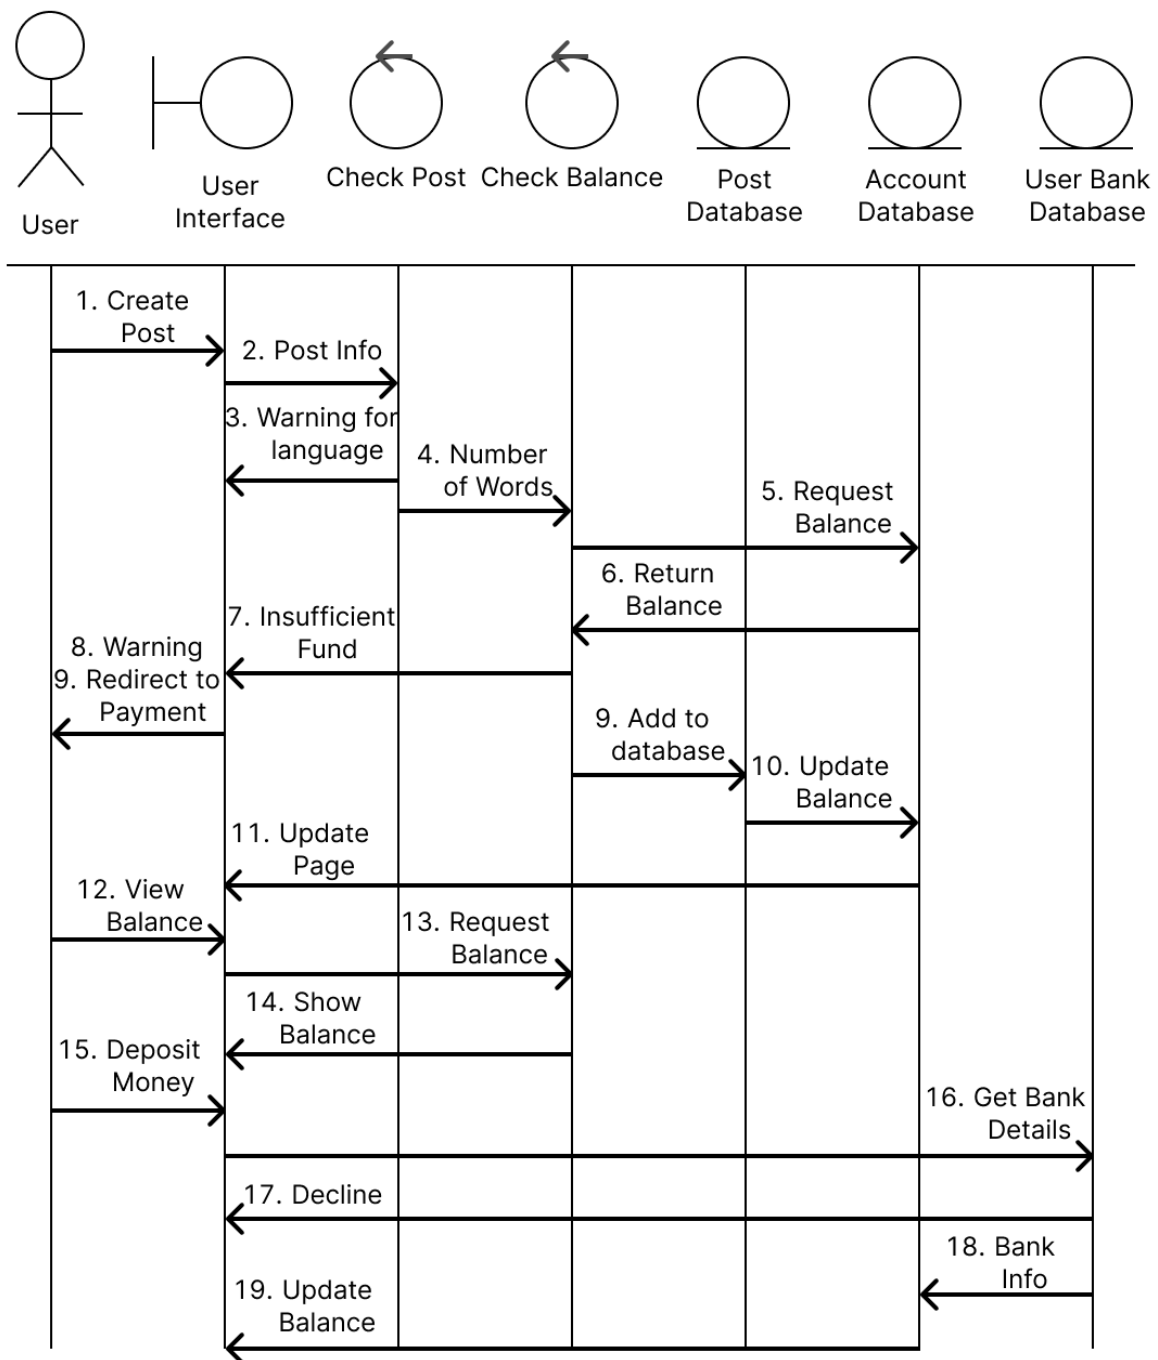

Mini Twitter	Version: 1.0
Software Design Report	Date: 11/21/23
Document Identifier: 10	

Sequence Class Diagram for like/dislike, comment, and share on a post:

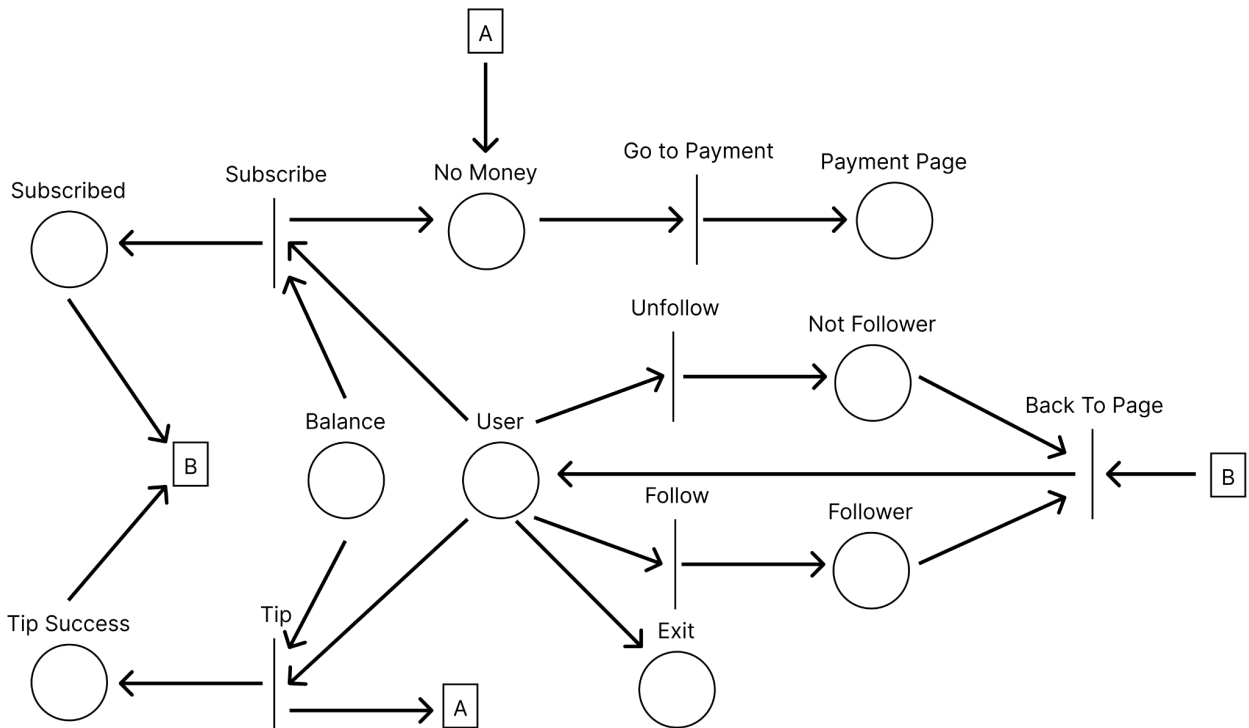

Mini Twitter	Version: 1.0
Software Design Report	Date: 11/21/23
Document Identifier: 10	

Sequence Class diagram for post, view balance, and deposit money:

Mini Twitter	Version: 1.0
Software Design Report	Date: 11/21/23
Document Identifier: 10	

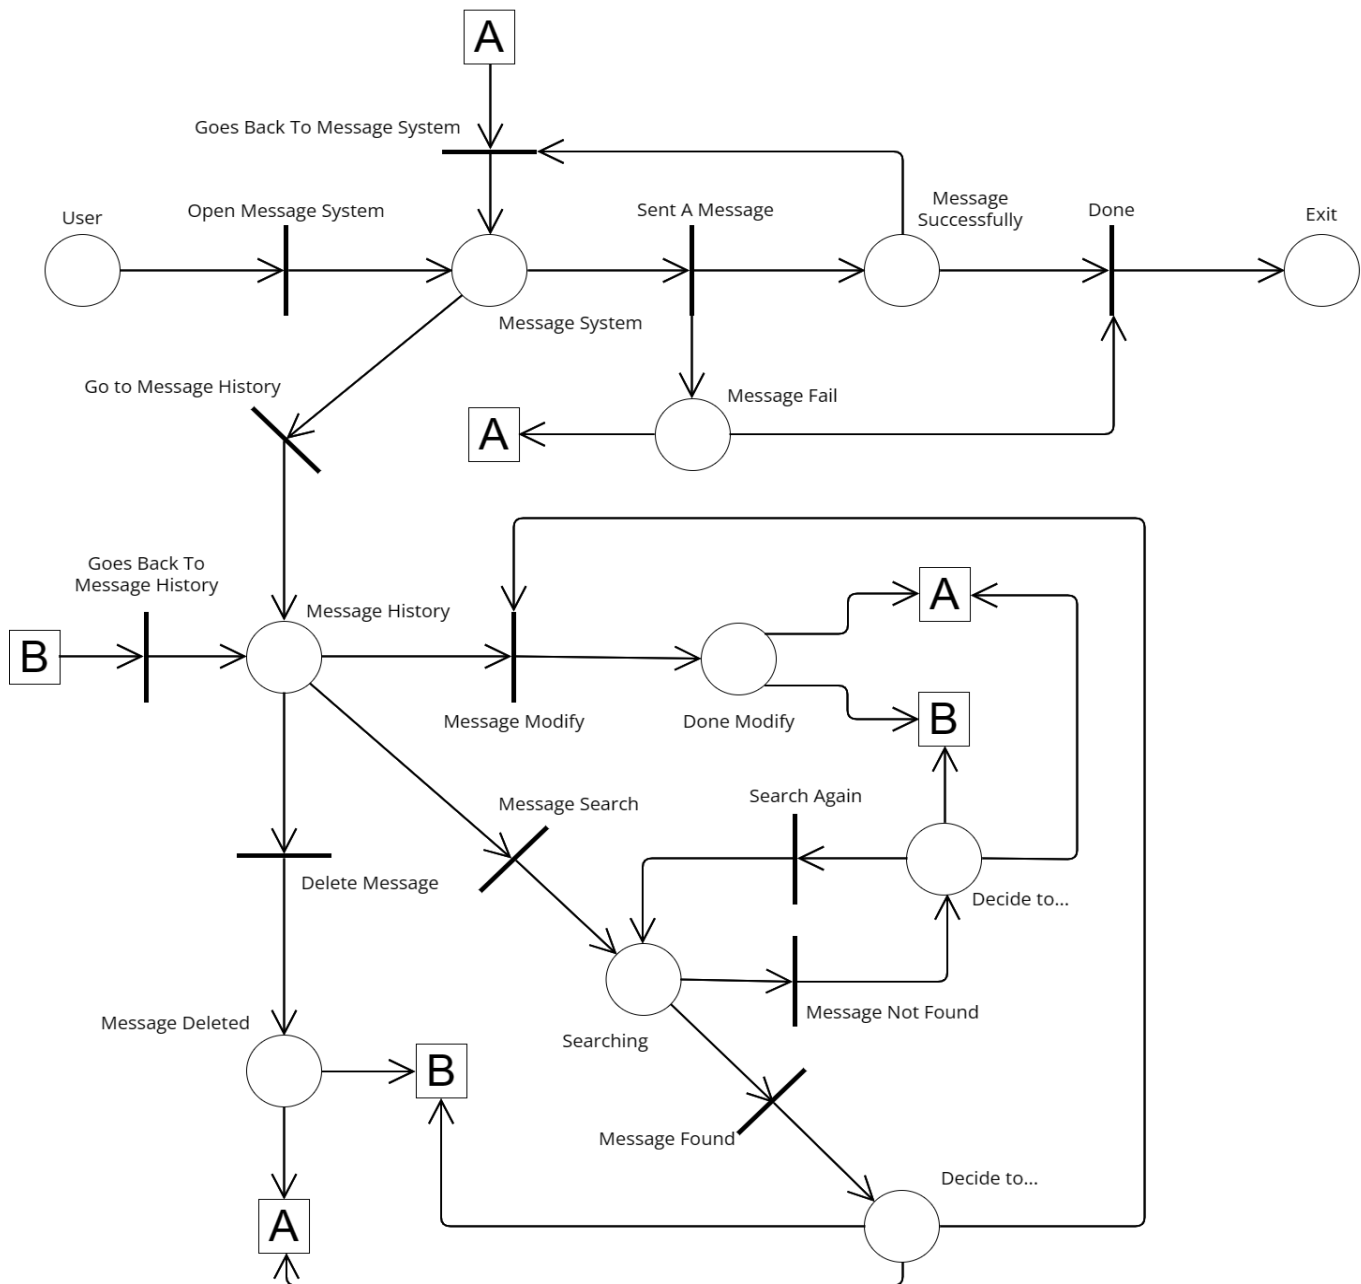

Petri-net for follow/unfollow, subscribe, and tip to user:

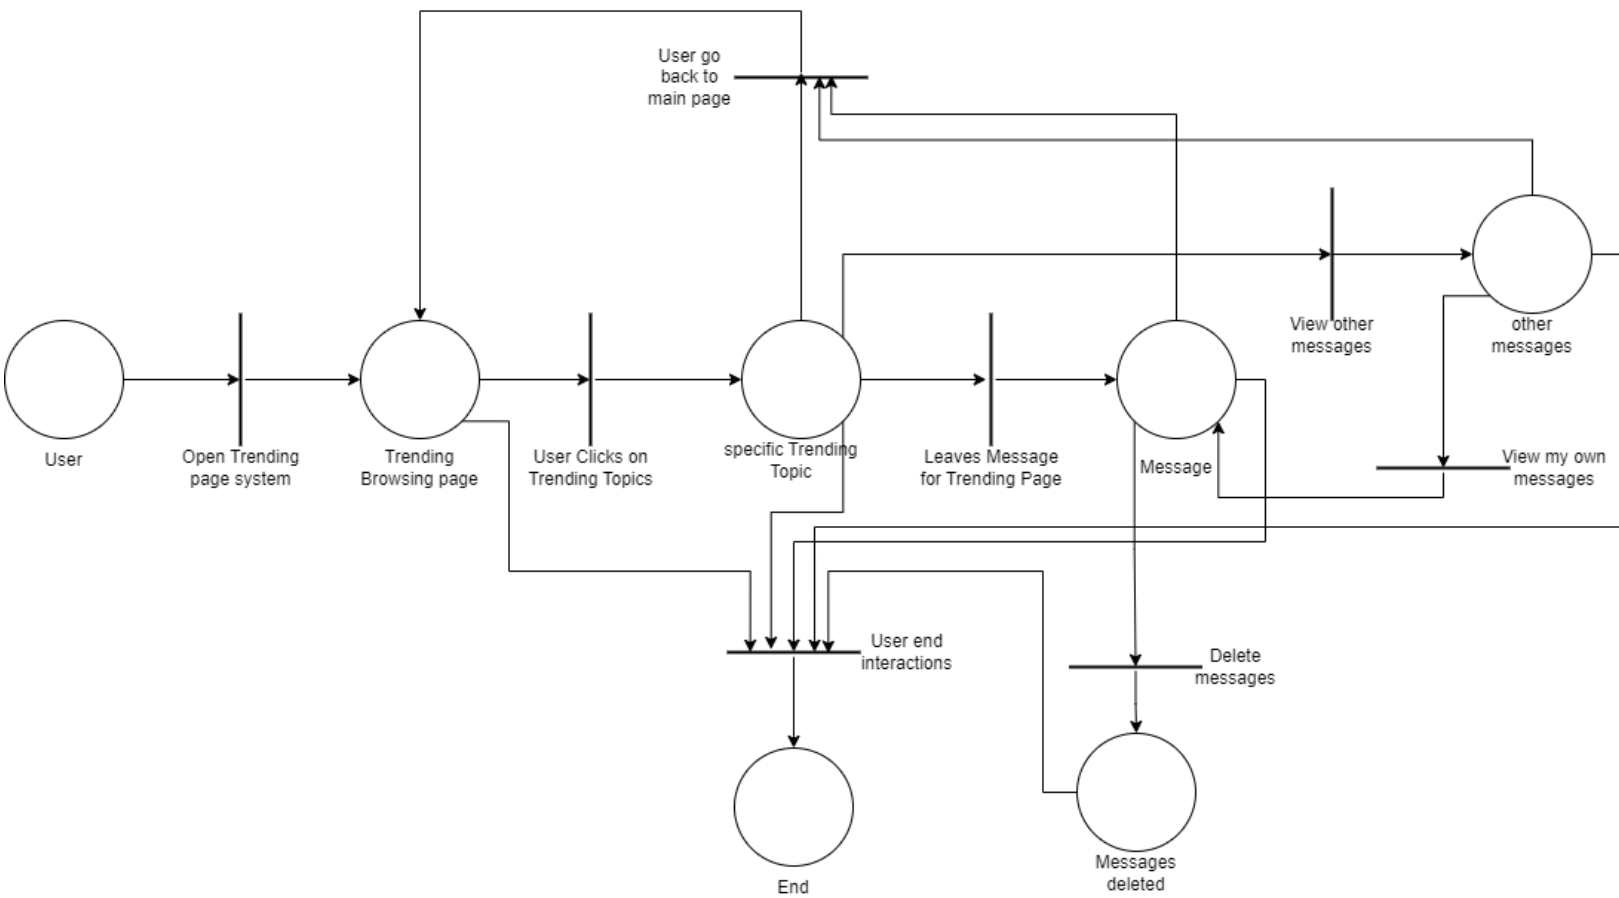

Mini Twitter	Version: 1.0
Software Design Report	Date: 11/21/23
Document Identifier: 10	

Petri-net for open, send, see, modify, search, and delete messages:

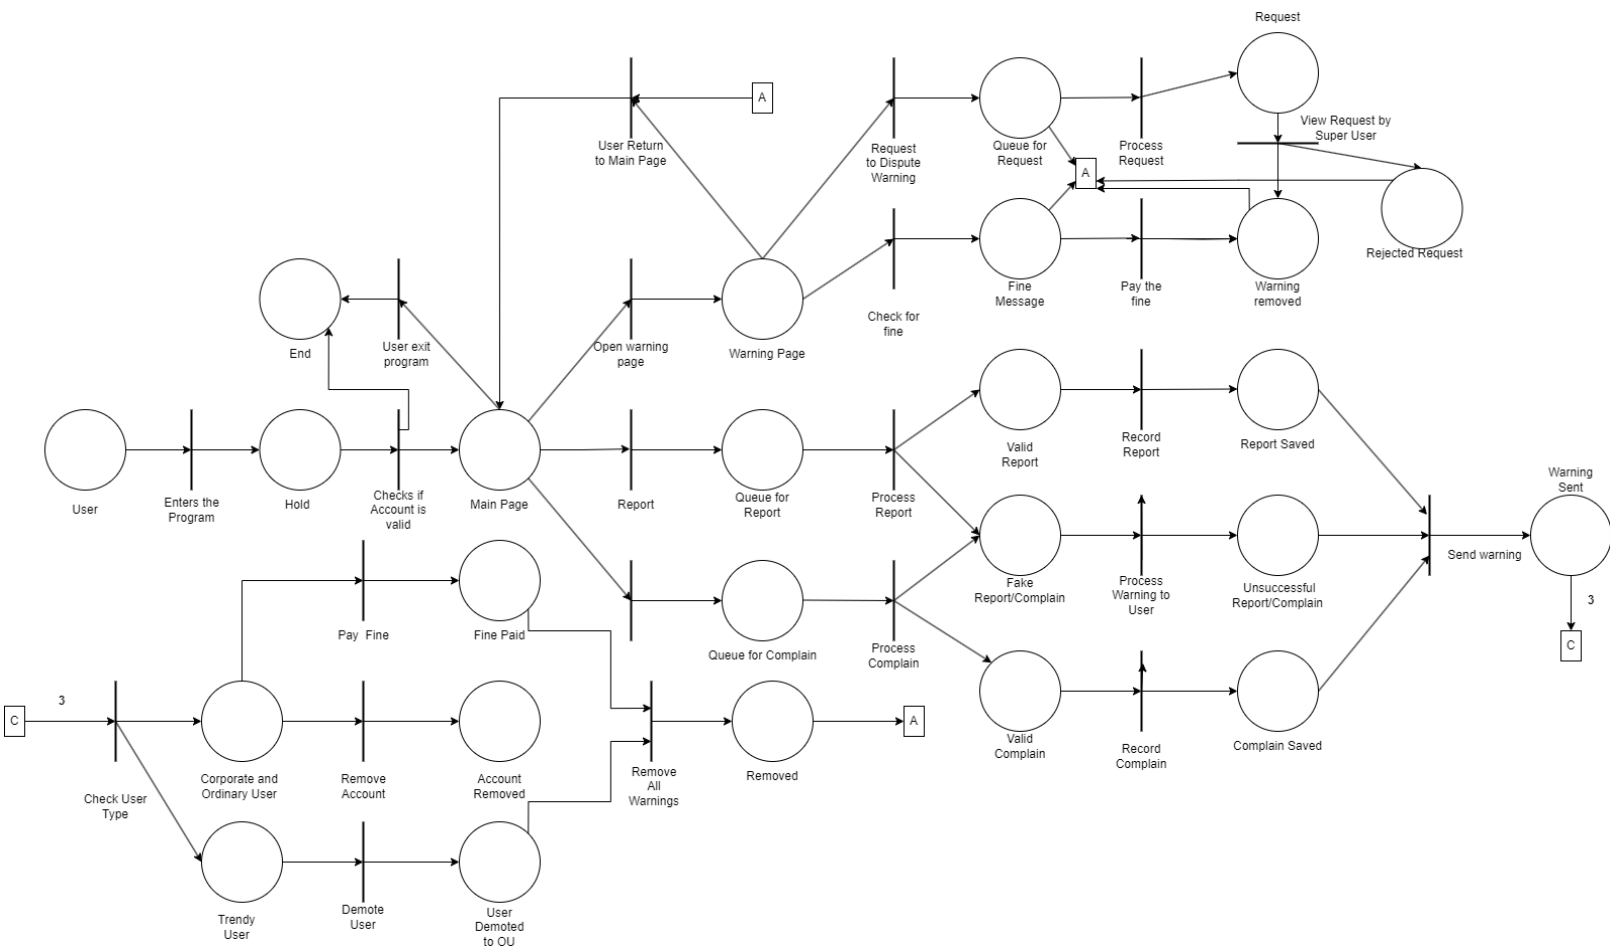

Mini Twitter	Version: 1.0
Software Design Report	Date: 11/21/23
Document Identifier: 10	

Petri-net for open, comment, view users, and posts on trending page and create messages, deleting message, and viewing message on trending page:

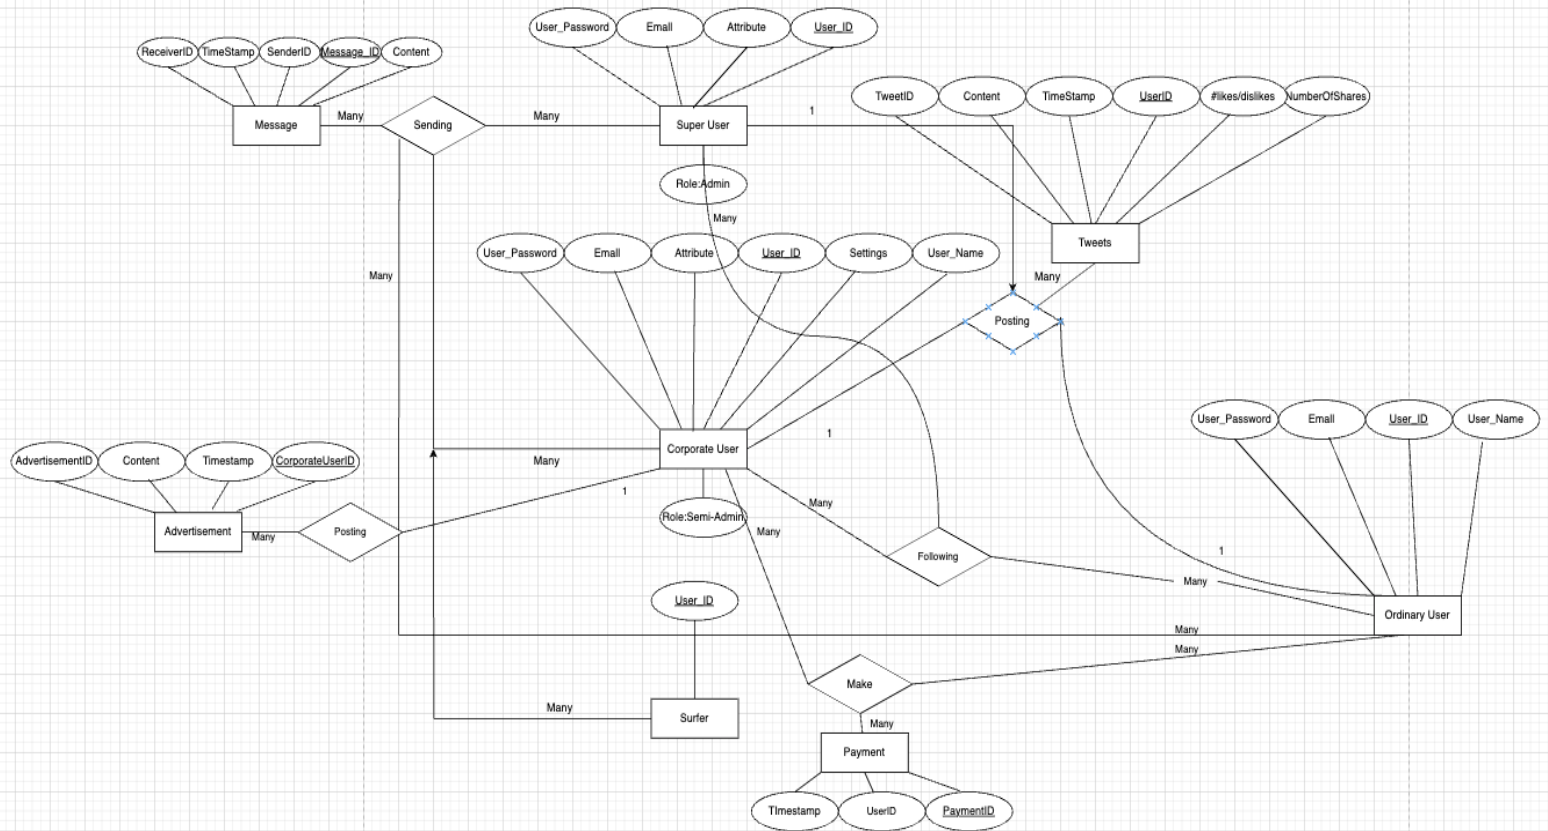

Mini Twitter	Version: 1.0
Software Design Report	Date: 11/21/23
Document Identifier: 10	

Petri-net for complains, warnings, and reports on users:

Mini Twitter	Version: 1.0
Software Design Report	Date: 11/21/23
Document Identifier: 10	

## E-R diagram

Mini Twitter	Version: 1.0
Software Design Report	Date: 11/21/23
Document Identifier: 10	

## Detailed Design

### 1. Account Creation and signin/signout

Function: Register(userName, userEmail)

Set registrationStatus to "Registration Failed: Invalid Input"

if (validateInput(userName, userEmail))

if (isUniqueUser(userName, userEmail))

createUserAccount(userName, userEmail)

sendConfirmationEmail(userEmail)

changePassword()

redirectPaymentPage()

Set registrationStatus to "Registration Successful"

Else

set registrationStatus to "Registration Failed: User Already Exists"

Else

set registrationStatus to "Registration Failed: Invalid Input"

Return registrationStatus

Function: validateInput(userName, userEmail)

Return true if input is valid/in the right form, false otherwise

Function: isUniqueUser(userName, userEmail)

Return true if the username and email is unique, false otherwise

Function: createUserAccount(userName, userEmail)

Include error handling for any issues in account creation

Set the user information into the account database

Return none

Function: sendConfirmationEmail(userEmail)

Generate random password

Send a email with the temporary password generated

Return none

Function: changePassword()

Enter new password

Set password to the new password

Return none

Function redirectPaymentPage()

Mini Twitter	Version: 1.0
Software Design Report	Date: 11/21/23
Document Identifier: 10	

Change UI to the payment page  
Return None

Function: Signin(userEmail, userPassword)  
 Set signinStatus to "Sign in failed: Invalid Email or Password"  
 status = False  
 if(checkUserEmail(userEmail) and checkUserPassword(userPassword) and  
 status)  
     Set signinStatus to "Sign in Complete"  
     setUserStatus(userEmail)  
 Return signinStatus

Function: setUserStatus(userEmail)  
 Obtain user from user database  
 Set status to logged in  
 Return none

Function: checkUserEmail(userEmail)  
 Check with user database  
 Return true if success else false

Function: checkUserPassword(userPassword)  
 Check with user database  
 Return true if success else false

Function Signout()  
 Clear current session  
 print("User signed out successfully")  
 Return none

## 2. Payment System

Function: addFunds(userEmail, amount)  
 bankInfo = retrieveBankInfo(userEmail)  
 if bankInfo:  
     balance = bankInfo.get('balance')  
     if balance > amount:  
         updateBalance(userEmail, balance - amount)  
         status = takeMoney(amount)  
         print(f"Transaction Status: {status}")

Mini Twitter	Version: 1.0
Software Design Report	Date: 11/21/23
Document Identifier: 10	

```

        else:
            print("Insufficient balance to add funds.")
    else:
        print("Failed to retrieve bank information.")

```

```

Function: retrieveBankInfo(userEmail)
    Retrieve bank information through an API
    Balance = userEmail.getBalance()
    return balance

```

```

Function: updateBalance(userEmail, newBalance)
    userBalance = newBalance
    Return none

```

```

Function: giveWarning(message)
    Add warning to list
    print(f"Warning: {message}")
    Return none

```

```

Function: takeMoney(amount)
    print(f"Taking {amount} from the user's account")
    Take money using an API
    return True if success

```

### 3. Post Tweets/Post Advertisements

```

Function: postTweets(post, user)
    words = countwords(post)
    amount = calculateMoney(words, user)
    takemoney(amount)
    add post to database

```

```

Function: countwords(post)
    Word = 1
    Video = 15
    Image = 10
    Return sum of words, videos, images

```

```

Function: calculateMoney(words, user)
    If user is CU

```

Mini Twitter	Version: 1.0
Software Design Report	Date: 11/21/23
Document Identifier: 10	

```

        Return $1 * words
    Else
        If words > 20
            Return $0.1 * (words - 20)
        Else
            Return 0

```

```

Function: postAdvertisement(ad, user)
    If user is CU
        Add ad to database
        Update Page
    else
        GiveWarning(message)
        takeMoney(10)
    Return true if success, else false

```

```

Function: ClickAd(ad)
    Add one to total click
    Ad's user pay SU $0.1
    Return none

```

```

Function: ClickPost(post)
    Enlarge post
    Increment click count
    Return none

```

#### 4. Like/dislike/share/comment Post

```

Function: Like(post)
    If post.getLikedStatus() == true
        removeLike(post)
    else
        addLike(post)

```

```

Function: RemoveLike(post)
    Decrement total like
    Update post

```

```

Function: Addlike(post)
    Increment total like

```

Mini Twitter	Version: 1.0
Software Design Report	Date: 11/21/23
Document Identifier: 10	

Update post

Function: Dislike(post)

```

    If post.getDislikedStatus() == true
        removeDislike(post)
    else
        addDislike(post)

```

Function: RemoveDislike(post)

```

    Decrement total dislike
    Update post

```

Function: AddDislike(post)

```

    Increment total dislike
    Update post

```

Function: SharePost(post, user)

```

    postTweets(post, user)
    addComment(comment, post)

```

Function: addComment(post)

```

    Enter comment
    Add comment to post
    Return True if success, else false

```

## 5. View/send/delete/edit Messages

Function: viewMessages(user, otherUser)

```

    Open message of party one and party two
    displayMessages()
    Return none

```

Function: displayMessages()

```

    Open message UI
    Return none

```

Function: sendMessages(user, other user)

```

    Enter message
    Send message to other user
    Update UI

```

Mini Twitter	Version: 1.0
Software Design Report	Date: 11/21/23
Document Identifier: 10	

Return true if message is delivered, else false

Function: editMessage(message)

Message becomes edible

Complete edit

Return true if edit is complete, else false

Function: deleteMessage()

Message = messages.getMessage()

Delete messages[message]

## 6. Get/View User Profile

Function: ViewProfile(user)

Show profile screen

Return None

Function: getUserProfile(userID)

if (isUserExist(userID))

    userProfile = getUser(userID)

else

    set userProfile to "User Profile Not Found"

return userProfile

Function: isUserExist(userID)

Return True if userID in database, else false

Function: getUser(userID)

Return User[userID]

## 7. Add/resolve/remove warning

Function: addWarning(userID)

userID.warnings += 1

Function: removeWarning(userID)

userID.warnings -= 1

Function: payTheFine(userID)

Fine = userID.warnings\*FineConstant

If retrieveBankInfo(userID) == True

Mini Twitter	Version: 1.0
Software Design Report	Date: 11/21/23
Document Identifier: 10	

```

        While userID.warnings > 0
            removeWarning(userID)
            Print ("Success")
    Else
        Print ("Insufficient balance")
    Print "Failed to remove warnings")

Function: checkWarnings(userID)
    If userID.warnings > 3
        PunishUser(userID)
    Else
        Return 0

Function: removeAccount(userID)
    Remove userID
    Print("Account removed")

Function: PunishUser(userID)
    If userID.type == OrdinaryUser
        removeAccount(userID)
        Return Success
    Else
        userID.type = OrdinaryUser
        While userID.warnings > 0
            removeWarning(userID)
        Return Success

Function: resolveWarning(userID, decision)
    If Decision == true
        removeWarning(userID)
    Else
        Return false

Function: reportComplainHandler(userID, targetUserID, reportResult, complainResult)
    If reportResult or complainResult == true
        addWarning(targetUserID)
    Else
        addWarning(userID)

```

Mini Twitter	Version: 1.0
Software Design Report	Date: 11/21/23
Document Identifier: 10	

## 8. Follow/Subscribe/Tip User

Function: FollowUser(user, userToFollow)

if userExist(userToFollow):

Open Following UI

Add userToFollow into the Followed list

print("You Are Now Following")

else

print("User Not Found")

Return False

Function: Subscribe(user, subscribing, balance)

Open Subscription UI

Status = "Failed to subscribe

balance = user.bankInfo.get('balance')

if balance > \$10:

update(balance - 10)

Subscribing.subscriber += 1

Status = "Subscribed"

Return Status

Function: tipUser(user, userToTip, balance)

Open Tip UI

ShowBalanceInTotal(balance)

if balance > \$0.01

ProceedToTip(user, userToTip)

Update balance(balance - userToTip)

else

print("Balance Insufficient")

## 9. Complain/report Post or User

Function: reportPostOrUser(postOrUser)

get(postOrUser)

clickOn(reportButton)

selectIssue(issueType)

Enter details

submitReport()

Return True if success, else false

Function: DisputeWarning(warning)

Mini Twitter	Version: 1.0
Software Design Report	Date: 11/21/23
Document Identifier: 10	

```

clickDispute(disputeButton)
Provide Information
submitDispute()
Return True if submitted, else false

```

#### 10. Toggle Dark Mode

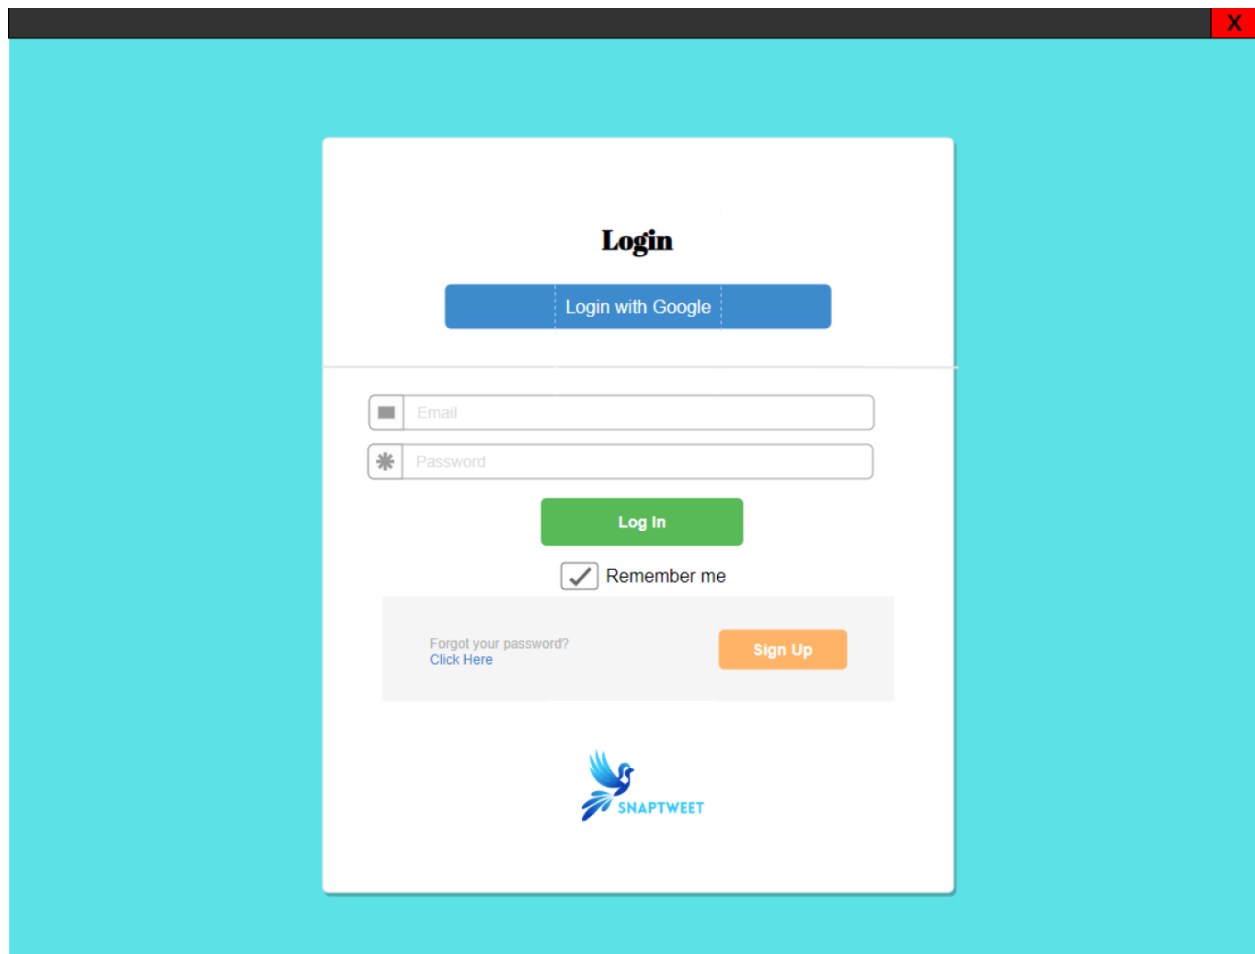

```

Function: toggleDarkMode(isDarkModeOn: boolean)
if (isDarkModeOn)
    setTheme('light')
else
    setTheme('dark')
Return none

```

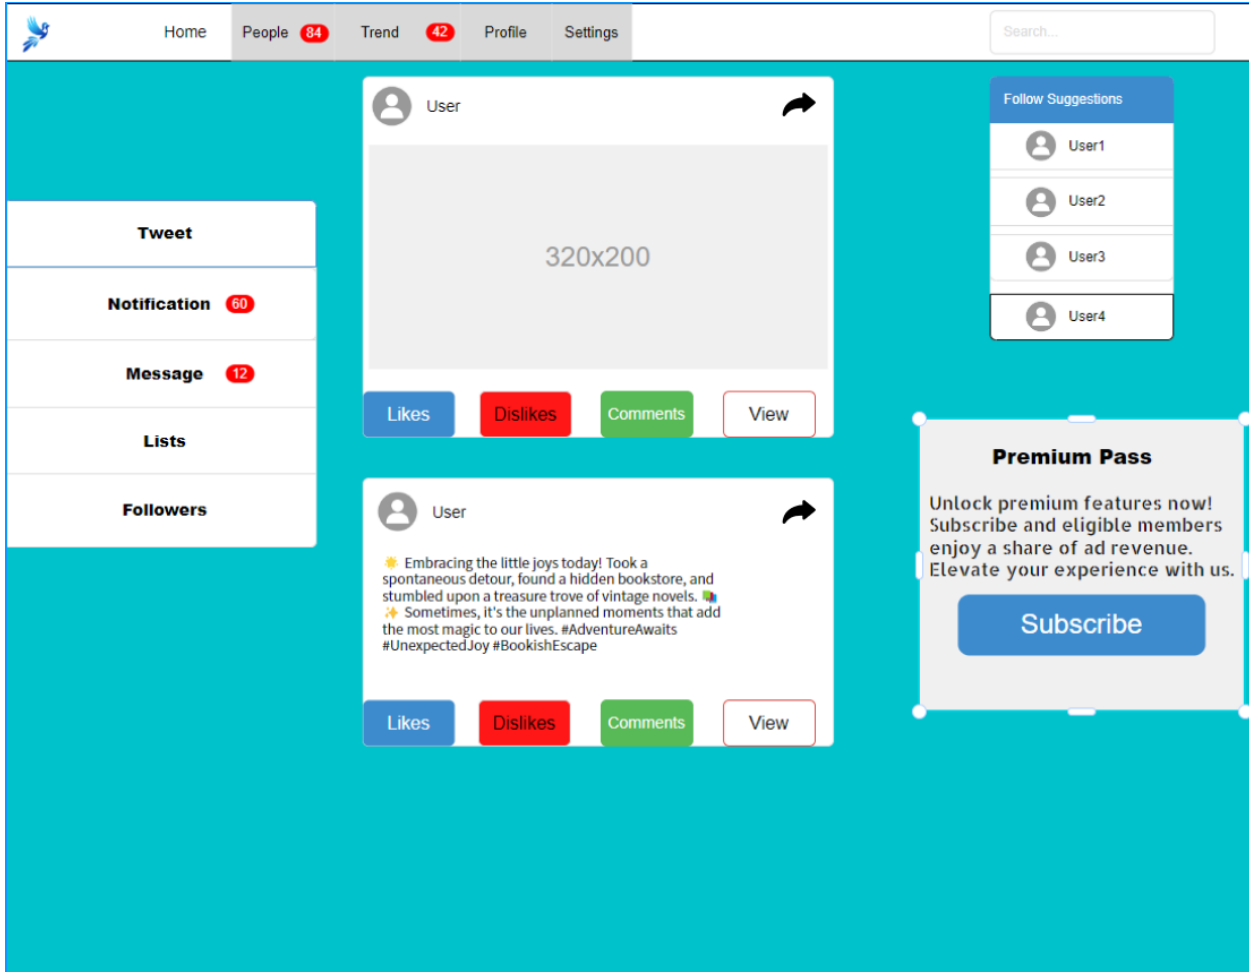

Mini Twitter	Version: 1.0
Software Design Report	Date: 11/21/23
Document Identifier: 10	

## System Screens

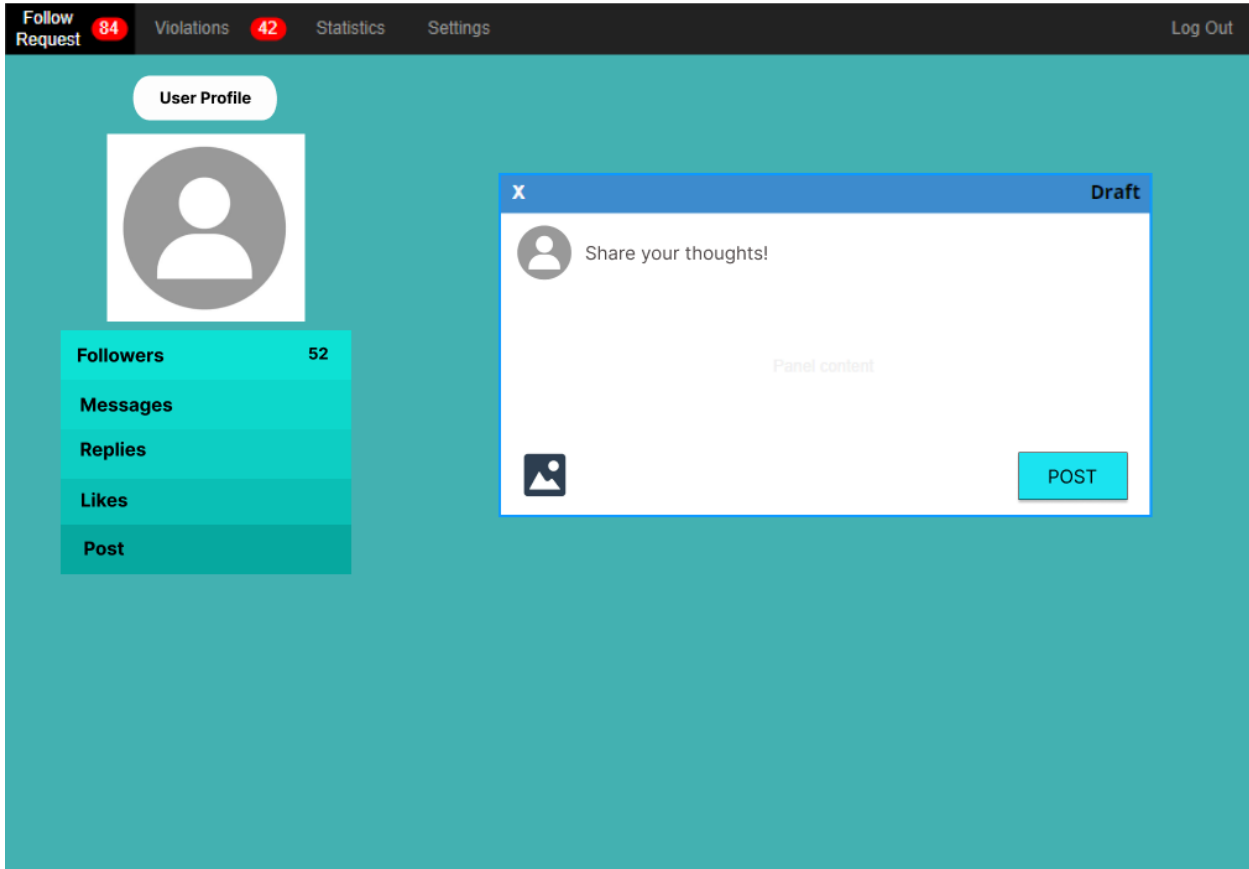

The screenshot displays a web browser window with a red 'X' icon in the top right corner. The background is a solid light blue. Centered on the page is a white rectangular login form. At the top of the form, the word "Login" is written in bold black text. Below this is a blue button with the text "Login with Google". A horizontal line separates this from the input fields. There are two input fields: the first is labeled "Email" with a small square icon to its left, and the second is labeled "Password" with a small asterisk icon to its left. Below the input fields is a green button labeled "Log In". Underneath the "Log In" button is a checkbox that is checked, followed by the text "Remember me". At the bottom of the form, there is a light gray rectangular area. On the left side of this area, the text "Forgot your password?" is displayed in blue, with a link "Click Here" below it. On the right side of this area is an orange button labeled "Sign Up". At the very bottom of the white form, there is a blue bird logo with the text "SNAPTWEET" to its right.

## Memos

Group Meeting: November 18th, 2023, 3PM - 5PM, All Attended

Finished Work:

- Most part of Use Case Diagrams
- Overall Collaboration diagrams
- E-R diagram
- Some of Detailed Design

November 20th, 2023

- Modification with the diagrams
- Added System Screens

November 21th, 2023

- Some modification with the diagram
- Added more parts in Detailed Design
- Complete Detailed Design

Possible Concerns: None
